Our Product

Peppy Doggy is a social platform for all of our pets, including dogs, cats, birds, crocodiles, and any other animal you consider a pet! Peppy Doggy allows you to interact with pet owners all around the world by sharing experiences and multimedia content about your pets, such as posts, images, and videos. Don't let your pet feel lonely; make her/him some new buddies!

Milestone 1 Project: Ruffhouse

Refer to the assignment for most of the details of the project

Usage

- Run `npm install` to install all the project dependencies
- Run `npm run start` to start the server
- Visit <http://localhost:8080> in your browser to see the web application

Development

There are TODOs scattered throughout the codebase. You can search for `CS5356 TODO` to see the items that need to be completed.

This project is almost functional but missing some key elements, and some of the features won't work.

Updates

There are likely some other bugs that I don't intend to be here, so there may be updates after
